1. Claims 1-27 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the allowability recites at least in part: a shaft frame unit formed with a fixing protrusion extended downwardly from a lower end thereof which corresponds to the support groove, and at its inner surface around the lower end with a seating recess having a certain depth, the shaft frame unit defining a cam hole in the direction of the first rotation axis when the fixing protrusion is fixed into the support groove, the shaft frame unit further being formed at its upper end with a second opening for exposing the seating recess toward the direction of the second rotation axis; a main shaft unit rotatably positioned in the seating recess at its one end, and supported by the second opening at a certain position, the main shaft unit being formed with a shaft cam adapted to rotate about the second rotation axis within the cam hole of the shaft frame unit; and a coil spring received in one side of the hinge housing and adapted to provide a certain elastic force to the shaft cam of the main shaft unit.
